- ALBUM GUIDE -

Hi there,

I'm dropping this simple guide, because, let's be honest, albums can get a little confusing.

Why get a wedding album? Because memories matter. You want your kids or grandkids to be able to travel in time in 20 or 30 years. Albums are the best way to enjoy photography.

Are the albums any good? Good? They're stunning!

What should I know before I scroll down?

The key information is that albums come in 4 different covers: Selfoss Velvet, Dolomiti Suede, Canary Leather, Cali Natural Linen. All albums are printed on Fuji Crystal Archive DPIX Silk paper.

How do I order?

Get in touch with me to organise your preferences and we'll get your definitive wedding album designed.

Selfoss Velvet

Inspired by the moss covered lava of Iceland.

Soft, luxurious, slightly shiny fabric
that makes the album impossible to put down.

Born from the love of adventure.

Kind of like a faux suede, but better.

A dark green, textured book cover is the central focus, lying flat on a light-colored wooden table with horizontal slats. The words "OUR DAY" are printed in a gold, serif font, centered on the cover. To the left of the book, a blurred green plant with long, pointed leaves is visible. In the upper right background, a stack of white papers or a notebook is partially visible. The lighting is soft and natural, creating a warm and serene atmosphere.

A stack of various leather samples, including different colors and textures, is held together by a metal ring. The samples are fanned out, showing a range of hues from dark brown to light tan. The background features a textured, reddish-brown leather surface on the left and a patterned fabric on the right.

Real. Life. Memories.
